

InfoGaming.com Legal@InfoGaming.com Gary Hamilton, CEO 1.702.510.6740 Skype: sevenseservices

InfoGaming.com, DomainLords.com, LogoQuest.com are all owned and controlled by <http://SevenServices.com> currently having offices in Las Vegas, Ryazan, Kharkov, and Belgrade. Up to Date Portfolio of Gaming, Casino, Sportsbook, and related Domain Names in a PDF Format: <http://DomainLords.com/proformaofferdomains.pdf> and the same document in Word .doc Format: <http://DomainLords.com/proformaofferdomains.doc>.

Gary Hamilton sat on the Board of Directors of Playtech for 6 years from 1997 to 2003. Gaming Revenues increased from \$50 Million USD\$ to over \$1 Billion USD\$ per year without the aid of Sports Betting or Lottery streams. Gary Hamilton stepped down from the Board of Directors and aided Playtech Licensees in seeking autonomy to player balances and player information and compliance of the Licensor and Licensee Autonomy Provisions of the Licensee and Licensor Agreement. Gary Hamilton also worked on the Stanley Ho (MelCo) Baccarat, Roulette, and Blackjack Live Feeds interaction into the Playtech Platform in 2003 while I was in Tel Aviv stepping down from the Board of Directors of Playtech.

<http://InfoGaming.com>. InfoGaming.com, previously InterActive Solutions created the Playtech Office Complex in Tartu Estonia, InterActive Solutions (growing from 6 programmers in 1997 to over 350 programmers and developers in 2008.) Created the original source codes for Playtech Casinos and Ruby Bingo; Web TV Games and Casino games in Flash 1.4 and Html; Poker.com original source code; Wicked Casino for Jenna Jamison (In 2001, I had commitments from Dennis Rodman and Snoop Dog for Online Casino Platforms but negotiations broke down after I had promised them a Free Platform, License, and Hosting in lieu of the their name and draw as a foothold in the industry but other Board Members wanted the Platform, Licensing, and Hosting to be paid by the Celebrities); Avatar Online Poker Room (first online poker room in 1998-I came into to identify the security features to log audits to game play as well as money laundering and cashout distribution methodology in 1999-the SAME application of the log audit methodology that was recently breached in 2008 at Absolute Poker and Ultimate Bet.); BingoTV.com with Dish Network Satellite; CGTV Joint Venture Capital with Rogers Canada (Nothing related to or with CGTV Games.); and currently with online, land based, and tribal casinos and other gaming ventures, progressives, lottery, tournaments, marketing, Infomercials, and the integration and updating of Player Reward System Profile technology to surgically disseminate and reward players as well as graduated program incentives to guarantee Player Brand Loyalty PBL and the integration of all forms of gaming online, land based, mobile, and satellite as all forms of gaming will soon be available from the Xbox, iPhone, Blackberry, DirecTV, Cable, and traditional land based gaming.

InfoGaming.com has been in a 5 year contractual abstentia ending in May of 2008 which restricted the development, advertising, or creating any new gaming or gaming related web sites. However, it did not stop InfoGaming.com and DomainLords.com from purchasing more domains and preparing for the most exciting time in gaming as soon Gaming will be licensed and legal in the US. However, it is imperative to understand the parameters of legalization in the US and UK and what it will mean in the future. As Gary Hamilton the CEO of InfoGaming.com is currently spending the majority of his time consulting land based casino, bingo, keno, and poker in Nevada and for the Tribal Nations, InfoGaming.com is seeking Joint Venture Partner Capital Active or Passive Project in the development of the InfoGaming.com Portfolio of Domains in

PDF Format: <http://DomainLords.com/proformaofferdomains.pdf> and in Microsoft Word .doc Format: <http://DomainLords.com/proformaofferdomains.doc>; and, also the fruition of the Activities of SevenServices.com in its creation of downloadable MultiMedia Rich Media Format PDFs that will also have embedded rotating flash banner advertising and keyword and search features. Contact Gary Hamilton, CEO if you are interest in The Joint Venture Partner Capital Active or Passive Project.

Education and Background, *Gary Hamilton, CEO*

Born NYC, NY 1951 on Staten Island. University of Nebraska; Doane College, Lincoln Nebraska. President of the Phi Theta Kappa Honor Society. BA, BBA, Major in Accounting. Minor in Computer Technology. 6 Credits and Dissertation Short of a Masters Degree in Economics from Doane College. Lived In Tokyo 1969-1971. Co Owner of 5 Ships with my father, Harry Hamilton shipping cement and produce from Bangkok to Saigon and Grain to India from 1969 to 1975 until the fall of Saigon during the Vietnam War. Other Business Enterprises Owned and Sold: Tax and Accounting Service 500+ Clients; Jewelry Store; Grocery Store (20,000+ Square Feet); Translation and Interpretation Services in 50 Languages for Gallup, Polk, RL Donnelly, General Foods, Canon, Fiery, Apple, Linux, Red Hat, Free BSD, Red Lobster, Chi Chi's, State of Nebraska Courts, Social Services, USFSP, IRS, INS, Lincoln Housing Authority, DARE, Police, Prisons Hospitals, Doctors, FBI, NEHP, Nebraska Supreme Court; and US Supreme Court-300 Interrupters and Translators using 22 Different Language Versions of Windows and NT running on the same network as well as OS2 and Warp. In early 1994, Synergy International Business Services created the second ISP in Lincoln Nebraska. Desktop Publishing Services in 50 Languages: Synergy International Business Services, Publisher of the Chicago and Los Angeles Chinese and Korean Yellow Pages (1,000 pages plus); US Yellow Pages Vietnamese Directory. From 1988-1997 a Professor at Southeast Community College, Lincoln School of Commerce and at the Nebraska Men's and Women's Correctional Institute. Also taught Middle and High School Gifted Children Programs; Troubled Youth Programs. 1994-Ported the Nebraska Real Estate MLS System from Mainframe to the Internet through OS2 for online access for the Realtors through a DOS Query and later OS2, Warp, and Windows 3.0 format. 1993-1996-OS2 and Windows Software Director for the State of Nebraska for Social Services for the entire state responsible for training, hardware, software, and operating system support in addition to the mainframe porting of Social Services records to be accessed through secure login by phone or over the Internet for two years. I have been in 68 countries on 6 continents. 1997-Moved to Las Vegas from Lincoln Nebraska for the mineral waters and the quiet restrained lifestyle and to marry my wife Dr. Yelena Hamilton, my soul mate and best friend. Since 1997, Dr. Yelena Hamilton and Gary Hamilton have started, owned and operated offices in Tokyo, Manila, Montreal, Moscow, Kharkov, Belgrade, Ryazan, Winnipeg, Tartu, Tel Aviv, and Las Vegas.

Education and Background-*Dr. Yelena Hamilton, CFO*

Born Moscow Russia 1956. Immigrated to the United States and Las Vegas in 1991. Languages. Fluent and Bilingual in English and Russian, in addition a high decree of German, Polish, Ukrainian, Bulgarian, and most Eastern European Languages. Doctorate in Medicine from Republic of Kazakhstan Medical College in Almaty and the Asphendyarov Medical Academy, at that time the capital of Kazakhstan. Dual Doctorate in Pediatrics and Surgery specializing in Pediatric Surgery and Heart Surgery. Medical Doctors in Russian require 21 years of schooling compared to 18 in the US and UK. Graduated with a Red Card which is all "5's" or "A's" in all classes. Kazakhstan Minister of Health and Administrative of 43 Hospitals in Kazakhstan (Kazakhstan is 5 times the size of Texas) with over 3,000 doctors, nurses, and medical personnel. Under the Russian Federation with Kazakhstan as a state of Russia was on special assignment and on call for and in Uzbekistan, Kirgizstan, and Russia in the equivalent as a Red Cross Director for disasters, epidemics, and forensics.

InfoGaming.com Gaming, Casino Achievements and Landmarks

1986 State of Nebraska Scratch Card Development “Pickle Cards”. Slot Style Strip Cards.

1989-1991 State of Nebraska Keno Development and Implementation as well as the desktop publishing, marketing, and standards for security for money laundering.

1997 Hands on creation of working office and development team InterActive Solutions in Tartu Estonia with 5 initial developers. Standard flash, html, java, Shockwave C++ Games evolving into Casino games in all programming formats.

1997 Interactive Solutions Game, Web TV Games, and Casino Games

1997 Playtech Casino and Ruby Bingo Source Code in Flash, Shockwave, C++, Java, Mobile Java. Executive Director on the Board of Playtech Casino, the only non Israeli ever to sit on the Board. I made agreements with Dennis Rodman and Snoop Dog and several other high profile celebrities for them to come under the Playtech Software but the Playtech Board of Directors saw no benefit in non payment of the software license to the value of having the use and profile of the celebrities promoting the software-a license fee was requested by the celebrities. The celebrities negated and either went with other software that was licensed to them for free or dropped the project completely. Over a 5 year period, the creation of over 100 different games based on complete template flash, shockwave and C++ allowing compilation of personalized casinos, admin, backend, and affiliate programs in days rather than weeks or months aka known as White Labeling but to a much higher decree and degree. Over 10,000 variations of games were created in and through this system. In addition the ability to use the template process to all aspects of the software. The templates were also scalable to any size and any language. Even though templates were used each casino and each set of games with graphics appeared different rather than all licensees using the same games; obvious if you visit the different Playtech licensees. Custom casino games and themes such as Western, Asian, Pirate, Space etc. were easily created and in different languages. Graphics could either be supplied by the licensee or left at the discretion of the staff graphic team. The concept came to me late one night in 1997 while watching the game technicians changing reel graphics and front machine skins to create what appeared to be completely new game using the same hardware, software, and reporting software. By creating scalability to interior and exterior graphics clients could choose theme, in house graphics or supply their own graphics within our parameters. The target at that time was to compete and share in the market share from Casino on the Net; and create a production template high quality online casino. I was also the first to hard code the affiliate code into the .exe for high performing affiliates and tracking large traffic buys to track the ROI . I initiated the first hardcoded C++ affiliate code into the downloadable .exe loader with basic 7 game download with options to download 50 more games-in essence a download manager as well as checking for updates to the games. The hard coding of the .exe file eliminated the inherent “cream” of the 5% to 12% loss of affiliate link traffic through cgi, java, cgi, and cookie tracking.

1997 Poker.com Source Code for 10 Online Games.

1998-2002 Increase of the original Interactive Solutions work center in Tartu Estonia from 5 to 30 to 300 programmers, graphic artists, and developers. In Tel Aviv, the creation of 24 Hour Playtech Customer Service; 24 Hour Playtech VIP Customer Service - Uncashable Cash Rewards; and the Physical Gift Delivery or Online Gift Certificates to VIP Customer Services. “Eye in the Sky” tied to player habits and play including alerts when VIP Clients came online, monetary limit alerts to new player that increased or decreased over a set period of time. I wrote

the outlines to comply to the Rico Act and Patriot Act to deposits and withdrawals and compliance voluntarily in 2001. Strategic Customer Rewards Plan programmed to encourage return visits based on parameters of play, time, value, and player habits. Security Strategy to fraud, check marketing, affiliates, affiliate fraud, and advertising purchases and the ROI, CPA, CPM, CPC. Lead Coordinator of Casino shows in Las Vegas, Montreal, Miami, New Orleans to Software Licenses and Affiliate Marketing

1999 Avatar Online Poker Room Security and Software Upgrades. Security to game play, log auditing, Rico Act and Money Laundering and funding reception and payment auditing as well as game play to eliminate the transfer of funds internationally through fraud in the game IE Audit Logs proved the premise that deposits were being made and during the play of X players that one to two players would bet, fold or lose or not draw cards to lose to transfer the monies to other parties playing to move money from one country to another country through the loss-deposit and with withdrawal and dispersement of funds methodology-the same auditing breach that recently occurred at AbsolutePoker.com and UltimateBet.com Poker Rooms. Also, the enforcement of funds back to credit cards to the limit of the deposit rather than debiting their cards above the credit card deposit. This was written and accomplished in all software to all venues of funds going in and out as US laws to Credit Cards, Western Union, Money Gram, Bank, IRS Form 8300 to US citizens and the participating Interpol parameters of which were programmed into the system and all systems I was involved in insure the legitimacy and compliance of the operations whether it was international law, local law, tribal law, or another country's law.

2001 Wicked Casino for Vivid with Jenna Jamison and the Vivid Cast. "R" Rated Casino. Wicked Casino Voted #1 in 2001 Adult Online Entertainment Adult Expo (AVN) in Las Vegas.

2003 Separation of Playtech Casino and all subsidiaries. Submission of Seat on the Board of Directors of Playtech Casino and all subsidiaries. Gary Hamilton is precluded by legal agreement to comment on the separation and submission.

2003 Gary Hamilton began consulting Playtech Licensees to seek autonomy to player balances and player information and the criteria set out in the Playtech License Agreements and Contracts to seek autonomy and higher revenues and control of the player balances, information.

2003 Ikobo.com - Consultation to security measures to comply with Rico, Patriot Act and obvious security flaws in the system to validation of sender's and recipients. Too late obviously as the owners chose not to comply with the parameters I had proposed and within 6 months seizure under the Patriot Act of all of their business and personal assets were enforced. Obvious cross referencing of addresses, repetitive deposits, and validation of the addresses, phone, and identification of the receiver were never implemented negating what could have been a very profitable and viable business venture.

2003-2006 Avago.tv Combination of Bingo and Lottery, Roulette, Keno, and Card Games. On Sky Satellite to the UK and Ireland the transmission was augmented and updated via a simultaneous phone connection that allowed bets through the Sky Remote Control Unit. Downside the simultaneous phone connection @ 10p to 20p per minute-PPV IE Connection Charges Billed to the Phone Bill. The basis of the PPV for Avago.tv was no advertisements were displayed during its airtime and costs were assumed by the PPV. The new Sky Bet Satellite Bingo software from Parlay as well as the other casino games are still very hard to work and clumsy through a remote control. HDTV and Internet Connections wirelessly though Bluetooth or hardware should eliminate many of these issues over time including game overlays of the Video Signal and the Game Play in lieu of the PPV Bingo Packages will be purchased at the cashier as they are in the Bingo Hall.

2004-2005 JVP Venture Capital Fund Raising for CGTV-which ran in Canada on the Rogers Cable system for a short period of time. The anticipation of the project and the involvement of certain parties should have guaranteed its success but lack of direction, initiative, and moving forward with potential live broadcasts and funding of Poker Tournaments, Million Dollar Bingo Events never evolved. Instead it became a hotel and casino review site. The gap of time between funding and finally securing a small spot on Rogers Cable, over 2 years plus killed the project.

2005 BingoTV.com: Worked with the owners and Dish Satellite Systems to create Bingo on TV as well as on the Internet simultaneously. Short lived. Underfunded. Myopic Owners. Small minded executives filling 24 hours of programming with no reasoning to variations of prizes that game to game would range from a new car to \$50 Gift Certificates to The Outback, Amazon Gift Certificates in lieu of cash prizes and advertisers. The prizes given by the companies were allotted time to promote a small Infomercial on their product or service before the game. Bingo Card distribution was clumsy and not set up for the initial and continued response. The mixture of TV, Gaming, Response, and adjustment to the three led to BingoTV.com early demise.

2006-2008 Software Development SDK, Flash, and PDF Multimedia.

2007-2008 Land Based, Tribal Casino Consultant. Domain Development; Marketing; SE Placement; Media Purchasing.

2008 Launch of LogoQuest.com – Vector Based Logos, Banners, Graphics.

2008 Fall 2008 SevenServices.com Portfolio of Domain Names related to PDFs and EBooks and PDFAds.com Serving Rotating Flash Banner Advertisements, Static Advertisements from PDFs, EBooks, and XML Keywords. Basic Concept in its simplest form: a downloadable YouTube with Content, Interaction, Games, Video Conferencing, and 4 TBs of Free Games, Books, Movies, Cartoons, Comics for download with unobtrusive advertising and the ability to control the advertising media.

Included in the SevenServices.com portfolio of domain names include in the PDF Multi Media Rich Media Format Project include the following domain names: EBookAffiliates.com; EbookComics.com; EBookInternational.com; EbookSolutions.com; LiveBrochure.com, PDFAd.com; PDFAds.com; PDFDevelopers.com; PDFPublishers.com; PDFStudio.com; PDFStudios.com; PDFSuite.com; UltimateHomeTours.com as well as the comprehensive domain holding of DomainLords.com in Studio Domain Names IE ToonStudios.com, VegasFilms.com, Content Domain Names IE PhotoContent.com, CelebritiesContent.com, Magazine Domain Names, Guide Domain Names, News Domain Names and other developable periodical domain names that can be published and updated on a informational basis or weekly or monthly periodicals that can be developed and subscribed to for free based on advertising returns from the Advertising.

With the advent of legalized gaming worldwide and the immediate competition and attrition it will create in the advertising media the ROI on PDF Advertisements is a cutting edge concept that will Yahoo was working on until the Microsoft and now Google agreement went into place. With Yahoo dropping out of the development no one controls this market or is using it to its full advantage. One only needs to do a simple search on Google to seek the relevance that PDFs now get in Search Engine placement. Why? High Quality Content and meeting the algorithms of the Search Engines to placement. In a recent test of 250,000 downloads, the downloads produced an average of sustained click throughs of 6,000 per day for 6 months and continue-2.5%. Multiply this by 100 Million Downloads. 2,500,000 visitors a day.

Future of Gaming - 2 Year Projection

As evident from the recent legislation in the UK and now the presentation of various sponsored Bills before the US Congress and the Senate to the tax revenues of legitimizing and regulating of online gaming and sports betting it will only be a matter of time before others follow the baby steps of Las Vegas Sands and Cantor Gaming; Galaxy Entertainment in Macau; Richard Branson with the new Macau land based Casino Hotel; and Stanley Ho on both sides of the fence for the past almost 10 years to prepare and seek an immediate endless returns on Online Gaming. The other factor are the IPOs of Visa and Mastercard this year that will need supplemental boosts to their revenues and expect to lobby for the \$200 Billion+ a year in potential transactions. Software is called software because it is soft. Hardware is called hardware because it is hard or better yet programmed chip based and controlled and regulated by state agencies and regulatory commissions. Scandals like Absolute Poker and Ultimate Bet negate simple log audits that should have triggered the compromise immediately. I have a press release on the aftermarket OCX readers and RNG software readers that should be addressed as well. The UK model began 6 or 7 years ago with the involvement of UK Gaming Commission, Lloyds of London, RBS, and other well known and trusted entities creating secure software or hardware that could legitimize the game logs and results of software and guarantee its authenticity and honest and fair play. Ladbrokes, SkyBet, Virgin, and other online gaming entities welcome and embrace the auditing and authentication of their software. IGT, under Wager Works; Aristocrat, Microgaming, NextGen, Galaxy Entertainment, Cantor Gaming and others moving into the crossover market under the sanctions of the online legal UK White Licenses for Casinos, Sports Betting, Lottery, Bingo, Mobile, and Satellite Gaming.

InfoGaming.com has for the past 12 years kept a database of all relative articles to validate all of the statements made to assure due diligence and the flow of correct and accurate information. InfoGaming.com also keeps a complete database of holdings of online, land based and tribal casinos as well stock holdings and cross referencing of those parties as Privately Held Entities-

PTEs, Publicly Traded Offerings-PTOs, PEFs-Private Equity Funds with a watchful and mindful eye on the LBO, leverage options and leverage lease options that are currently in place. It is one thing to be charming, handsome and suave (which I am no longer am) witty (definitely) and full of entertaining and educating history and stories but backing up with facts the grey areas that are have plagued Nevada, Vegas, Atlantic City, Macau, and especially Online Gaming with established and creditable sources. I look forward to moving forward with this proposal and putting some real numbers and facts on the table. InfoGaming.com is goal and profit driven with all Services and Contracts *100% Guaranteed!* In Addition and as a Prerequisite *Bonus Goals and Parameters* are set to overachieve to benefit all parties.

Addressing online gaming, online poker, bingo, lotteries, and sports betting is imperative, as it clear as the UK already identified with the their due diligence the White Licensing Geographic Demographics which mirror the historical facts and incidents of the parties residing in Antigua, Curacao, and on the tribal lands in Canada as well the origin of the monies that funded many of these operations to begin-it reads like the Nevada Gaming Commission Blacklist IF you know the inside story of these parties in these areas.

The answer is and should be, as it was in determination of the Tribal gaming, that Nevada and Las Vegas have set the precedent for Gaming Management, Regulation, Auditing, and Enforcement in the Gaming Industry since the early 1930s. The real numbers of online gaming (including bingo, lotteries and poker) presently are most likely around \$8,000,000,000 (eight billion) to \$12,000,000,000 (twelve billion) but what is even more staggering is the online sports wagering that is well over \$100,000,000,000 (one hundred billion) and could be closer to \$200,000,000,000 (two hundred billion). The Licensing. The Due Diligence. The Tax Revenue. The Auditing. The Regulations. The Enforcement. The Compliance. Governmental Reporting for the Wire Act, Rico Act, IRS Form 8300, SARS, and international reporting of the movement of monies should not be monopolized by the UK as they appear to be and will be unless something is done in the US; AND the UK Gaming Commission will not be able to adequately address all of the above once the US legalizes online, mobile and satellite gaming.

Right now, as you know or do not know LVS, Las Vegas Sands is operating a White License Malta License Online Casino as is the Yahoo Poker Room; and the following companies already have submitted and have received approval for online gaming, poker, bingo, lotteries, and sports betting White Licenses AOL, Google, Yahoo, Microsoft, MGM, Crown, MelCo, Galaxy, News Corp., Caesars with the major US Tribal nations following under in many cases the Ladbrokes management or part ownership.

In the coming year, the new blood of Vegas will be installing game rooms from their software vendors who have online mirrored versions of the same software that operates in the land based casinos from Wager Works owned by IGT, MicroGaming, Aristocrat, and several others. ANY other software besides established land based software developers should be highly scrutinized and the due diligence done by at least three authorities. Ask Ladbrokes or Rank.com about due diligence and the time, cause and effect-Guilt by Association.

The taxes generated from state lotteries is dwarfed by the possible tax revenues from legalized online gaming and right now the UK is the one reaping in all of the benefits of the licenses, tax revenues and governmental infrastructure from the highest level to each state.

The recent scandals in Poker at Absolute Poker and Ultimate Bet are examples of the poorest security and regulation-Scandal!!! NO Excuses for simple security breaches like this whether it is internal or external-NONE!!! These are simple audit logs and algorithms that I wrote 10 years ago and how can they go unnoticed at ANY level in the audit logs. In addition, the Poker RNG, *InfoGaming.com Historical Time Line*

Pods, and OCX software card reader software is another security breach that no agency would or should allow in any form on any online casino or poker room as it too breaches the security of the drawn cards. There are no land based casinos that allow software like this at the poker rooms.

Billionaires, Private Equity Funds, Overseas National Funds, and companies like Microsoft (Poker Software is already built into Vista), AOL, ViaCom, News Corp., Virgin, Ladbrokes, Google, Yahoo, Packers, always are given geographic tolerance to legal issues as is Visa and Mastercard which are American Publicly Traded Companies but still somehow take gaming transaction for online gaming. Did you know that the most profitable part of ATT is the Adult Channels on Cable and Satellite TV-Listed under Entertainment on the Income and Balance Statements of ATT. There is NO parity in the value of trying to enforcement laws on a few while others profit or stand to profit as they were born with a silver spoon in their mouths, pockets full of lobbyists, and arm's length that stretches around the world and a blind eye that fines and penalizes Bank of America \$20,000,000 for \$4,000,000,000 worth of illegal money transfers to terrorist nations-In other words, Bank of America money laundering at less than one half cent on the dollar. We all see enough TV and watch enough movies to know the juice rates to make transactions like this are 10 to 20 times the "vig." Now... that is some gambling on the odds of getting caught to the outcome-then again we all know the origin and the history of the Bank of America. Burn Notice time for BOA on the radar once and for all.

As I have written, InfoGaming.com has kept complete files on all of the players in online gaming since its inception who, what, where, where the money came from just like the Star Net and World Gaming scandal and Poker.com scandal. I am the one who called the SEC to let them know that the CEO and main stockholder of Poker.com had been convicted of a felony in the United States and the CEO had to step down and lose all of the stock options on Poker.com. Why? We created the original software for Poker.com; and I was stupid enough to give them the platform after receiving only the first 50% of the payment. Later, the same person was and has been convicted of many other cyber crimes and crimes including money laundering through the then Hell's Angels majority stock holder controlled Star Net; and recently of putting 40,000,000 spyware bots on computers worldwide. Yet, he travels freely across the border under assumed names and is free in Canada. He had a home in Las Vegas and still may I do not know. The last time I saw him at the Venetian he was startled as he knew he owed me money. I simply took hold of his hand to shake his hand and would not let go of it until I repeated over and over until he understood, "I was sorry to hear what happened to you when you lost all of your stock and stock options before it happened with Poker.com." Poker.com stock went to \$00.06 cents and I could not get a bank to cover my play to take it over... I still do not know if he understood me or not or just wanted to get away from me as he knew he still owed us the money. FYI Poker.com even after the change of the CEO and the scandal still refused to pay the remaining balance for the software as a past debt created by a CEO who is no longer with the company. Poker.com was still using the software as their game room software in Play For Free mode with our backend that was very flexible and functional to reporting the activities and player habits for client and customer information and profiling.

What goes on and what has gone in these areas that outside of the UK White Licensing Jurisdiction read like a Robert Ludlum or John Grisham novel. TreadStone, Blackstone, Blackwater, Blackrock which one of them is it-Two of the Four bring up different images in my mind then they should. These areas outside of the UK White Licensing Jurisdiction can be directly related to organized crime groups and syndicates, even some of those inside of the White Licensing jurisdiction are of question as the recent due diligence of 888 made Ladbrokes and Rank.com negated their offer of the buy out of 888. Ladbrokes and Rank.com do not believe in the old axiom that if you stare long enough at an existential liability that you can turn it into an asset. The liability or the assumption of liability far exceeded anything they wanted to assume

after their due diligence the innuendo, the rumors, the unanswered questions. In 888's favor and case or cause tainted guilt by association by Geographic Location in Tel Aviv and the past activities of others in the downtown technology and software quadrant of Tel Aviv; guilt by association by hosting in licensing in Antigua on the same rack space and the same facility as ...; unusual at it may be 888 set up the technology center in Gibraltar in 2003 and hosted Ladbrokes at the facility. 888 saw the writing on the wall to the perception of hosting and licensing in the islands where every night and all night it seems like it is just about an hour to the light of day. 888 continues to make deals with everyone everywhere; but I do not see them making the right agreement, the one that will turn the corner for them. 888 is a machine and worthy of praise and acknowledgement for what it has done in gaming but hiring someone to do international damage control and put an end to the rumors and innuendos that exist on heavily trafficked blogs and online casino guru reviewers and bloggers. Most of the Online Casino Reviewers and Gurus like CasinoMeister.com are sell outs running ads for the same company they have just blacklisted because they are being paid for it.

It is for reason that IGT under the UK and Malta register the name Wager Works developing online versions of their game inventory that they offer to land based casinos. The same with Microgaming as they too had the insight to develop online versions of the land based games. In both cases, game relevancy and branding brings trust and familiarity to the client. It also increases the play on these machines when the clients visit the land based casinos as they have found "Their Game" – "Favorite Game" – "Lucky Game" – "My Game" and the games they know and trust-"The games that REALLY pay off!" The customer and client think they have a system or insight to that the developers and creators and random number generation is in the spectrum of their cognitive process-IF the average customer and client knew the odds to what seem like "Close" or "Sure Things" like sitting on a Bingo Coverall with 54 numbers and the odds of hitting on the 55th ball...over 200,000 to 1. Or bet yet the Poker Software that determines what the customer or client should do and 75% of the customers and clients still be on their own emotions, instinct, and knowledge. Keno is the most profitable game in Vegas because of the lure of \$1,000,000 to pick 10 out of 10 of which the odds are in the billions to one-Million Dollar Keno is like finding your DNA match on this planet.

Aristocrat Gaming is moving forward with the Las Vegas Sands and LVS will be operating through its Malta License(s). Where is the grey line? When do pass out of the fire and into the light? Sir Richard Branson and Virgin Games is doing the same and licensing Microgaming online games as is News Corp. and Rupert Murdoch with SkyBet and Sky Satellite Gaming. Mega Giants! Mega Players positioning themselves in every media and medium they possibly can as all medias and mediums all blend into one-ask the cable and satellite providers and their losses to Internet Video broadcasts.

If the Nevada State Gaming Commission has a Blacklist, the world should have a blacklist that goes back to Cyberthrill Casino of which two of the Russian partners have a new software platform and live in the Boston area; and I believe are now US citizens. You would not believe what premiere domains they own. I just saw it is for auction and their software platform looks like it has lost all of its licensees. The third partner is on the top 10 most wanted list for email scams and Internet fraud and is hiding out in Russia. The third partner was the fall guy for the other two. I tracked the third partner down in a Montreal office to be paid the monies they owed us; and made them pay us the money they owed us. In the Cyberthrill offices were boxes and boxes of checks in 4 foot stacks to players and affiliates that were never paid-a dismay for us but our concern at the time was for us to be paid and not solve the problems of the world and others who did not have the where withall to Sam Spade their way to the Falcon's nest. Funny, as the third partner, the fall guy did remind me of Joe Cairo played by Peter Lorre in the movie Maltese Falcon, really more like the Maltese Falcon gungsel the great character actor Elisha Cook Jr.

Remember him in the original House on Haunted Hill as the home owner and in The Big Sleep as Jonsey with Bogart and Bacall. Bogart finished off Jonesy's killer with the great Raymond Chandler line... "What you want me to do? Count to three like they do in the movies!"

Central America, Antigua, Curacao, the other Caribbean Islands as well the Canadian Indian Stronghold in Montreal is a bed of the usual suspects, organized crime, and gangsters that never cease to amaze me-I am not talking about the First Nation Tribes in Toronto Territory but in Montreal to be clear in this matter. Investigations have finally begun in Montreal as Native American or Indian and Separate Nation Treaties are one of the most interesting legal subjects to jurisdiction and regulation or should I say self regulation-remember history shows many Wars being fought over those Treaties before the Indians hired the Great White Men from New Amsterdam and the Five Points to protect their legal rights. Antigua's WTO agreement with the US is worth about what they received out of it. There has been larger Penny Mega Jackpots paid out in Vegas then the award from the WTO.

With single digit declines on the Strip and double digit declines off of the Strip and the LBOs beginning before the Fed cuts the additional leverage payouts for the cash is enough to strangle anyone-let alone the Nevada Gaming has now dodged the bullet by what looks like a Nevada Teachers Association Agreement with the Properties for a Room Tax rather than the potential of the 44% Gaming Tax increase in Nevada the Nevada Teachers Association could have been able to put it on the 2008 Election Day Ballot. The question is still remains that Nevada ranks 47th out of 50 States in education-For that matter, I have always wondered on the audits and the possible dipping of Special Interest Groups into State Lottery Revenue and Gaming Revenue in other states. How does California have the State Lottery it does and have the amount and growth of Native American Gaming and run the deficits it does with the tax levels it has and the economy it has. Arnold... I am waiting for your answer. I thought maybe Arnold would get to the bottom of it but then again maybe it thought being Governor was like sitting on the board of the original Planet Hollywood Project.

Of course, Harrahs now Caesars will survive as they have cash influxes from the likes of James Packer and others they can always count on but the others will either be split apart and resold and flagship properties held onto or they will go the dinosaur's way. There are some out of the box visionaires and cutting edge minds making sense out of the economy, disposable income, and in land based gaming going back to the basics as we see the Las Vegas Experience properties and their numbers and hats off to the Four Queens for buying Binions for the name, for the price, for the overbookings at the Four Queens; and for the Cash Injection by Terry Caudill to TLC Casino Enterprises to make it all happen. The Las Vegas Experience which is sold out just about every night; and for good reason, perceived value and easy access to entertainment, gaming, service, good food at a reasonable price, the Experience, and the remnants of a well coordinated Room, Air Package Promotion especially by the Four Queens.

The numbers are out: Double Digit Declines off of the Strip. Single Digit Declines on the Strip for most properties and Double Digit Declines for others. Do not be drawn into complacency over the Melco and Packer drop of the lease option on the Wet and Wild property or the numbers that Stations Casinos just released as included in those numbers is the cost of Stations taking themselves off of the Stock Exchange and going Private as PHC (good reasons for going private as is Harrahs as the future in worldwide and online gaming without recourse from stockholders.)

Randy Black and Black Gaming bought out their remaining stock and even in this market gaming was only down 1% in Mesquiteville; and Randy Black was able to seek and receive concessions from his employees; AND Downsize Management and the duplication of positions and duties of the Mesquite properties. On top of that, Randy Black was brilliant in his move to

create several Infomercials on Mesquite and the Black Gaming properties and what... Golf. Few people know that Mesquite has a golf course in the top 30 in the world... Golf is money, with all and everything you have to buy to play golf and the fees to play the demographic mold could not fit better except for one thing-Randy trying to figure out how to get the Juice off of the bets being made on the courses as the players play.

One of the latest entries into the Vegas arena Dubai World has endless and deep pockets and is moving forward with all of its projects. It is the Juice that made Vegas and it will be the Juice that may well break it or at least right the ship. Wet and Wild property lease option dropped. The Cosmo delayed. Trump II on hold. Vegas and Nevada need online gaming and needs to license, regulate, and enforce compliance to online gaming in the form of licenses, company audits, game log audits, due diligence, enforcement of the various worldwide money laundering and organized crime laws and paperwork necessary by the licensees, collection of gaming taxes, distribution of the license and tax fee revenue. All of which Nevada and Las Vegas has done for the past 60 years and the level of which is the standard in the world. China opens up in Macau. Who do they look to for management, security, licensing, audits, due diligence, and compliance-Las Vegas. The model now being the UK Gaming Commission which will be at the time of legalization hard pressed to keep up with licensing, auditing, compliance, and enforcement.

The projection of tax revenue for Las Vegas, Nevada and the Federal Government could well help off set deficits, fund the Medial Insurance Policy Bill, easily fund the infrastructure updates that are so duly needed. The collapse of several bridges is just the tip of the iceberg to the liability that is in our infrastructure. Look at the value of the Sterling Pound. Look at the tidal gates project in London and the electricity it provides as well the protection in high water times to London. Imagine the same project generating electricity under the Verrazano Bridge in New York. The list goes on as small minds deal with the inevitable as the UK moves forward and will soon reap all of the tax, license, and utility of this project that would create economy and that the three most powerful cases for the economy: jobs, revenue, and tax revenue. Visa and Mastercard still process online gaming and now as IPOs on Wall Street will address this issue in some work around that allows US players to create offshore accounts as it does not in its “off shore debit card program.” Is this any different? Are Microsoft, AOL, Google and Yahoo as well all of the other billionaire’s game rooms positioning themselves for failure or do they know something that we all know should be addressed and addressed immediately. Not for 100 more years in Iraq. Not for trips to the Moon or Mars... How can we even think about going to the Moon or Mars when we the devastation of Hurricane Katrina along the Gulf Coast still looks like a Third World. How disheartening was it to see the cyclone in Myanmar and the devastation but somehow on the other side of the world help and aid was there within 30 hours which still leaves us with us with Gulf Coast and Katrina and the devastation that still plays out like Atlanta burning in the movie Gone with the Wind.

Justice Potter Stewart wrote: “I know obscenity when I see it!” The Nevada Gaming Commission knows compliance, legal, fair, licensed, taxed, audited, due diligence, security, background checks, and proper filing of all necessary governmental forms and paperwork to money laundering and organized crime. Nevada wrote the book on developing all of laws and parameters with the Federal Government and is only the natural choice to continue with it in overseeing online gaming and online sports betting licensing, taxes, fines, audits, and security. Las Vegas developed the face recognition software now used by the Federal Government. UNLV has an excellent Gaming Program and some brilliant minds in its Gaming Curriculum of which I believe some are now online gaming course related. UNLV can easily developed an accredited program to address the parameters and requirements of each facet of online gaming and its management, accounting, legal issues, and compliance. Harrahs, now Caesars manages more casino properties than anyone else in the world-All of the resources within a 50 mile radius!

What Hoover Dam and the WPA project did for Las Vegas is miniscule compared to what legalized online gaming regulated and licensed by the state of Nevada can do for Las Vegas, Nevada, and the US economy.

The UK Gaming Commission can NOT possibly handle the whole world and Online Gaming. Period!!! I have written to Gaming Commission on several tiered faults already on sublicensing, skinning, and white labeling AND already we have seen several instances that have come into the question on the licenses granted. One only needs the historical and current information to apply it against the model to see the weakness and where the predators will prey and feed.

InfoGaming.com also provides the Gaming Industry Cutting Edge Inside News, Resources, Legal Issues, and Current Industry and Economic Trends in and to Gaming worldwide-not just the normal array of "Gaming News" feeds and rhetoric but concise insights into the analysis of profitability, legal issues, processing, historical trends, and deadly accurate visionary details and perceptions to the Gaming Industry and the potential of the rich media formats available today like never before.

The Goal, Conception, and Premise of InfoGaming.com is to provide the Gaming Industry the Maximization and Realization of Profitability from Platform, Client, Affiliate, Customer Service, and Marketing ; and the segmented and synergistical dissection to net profitability beyond the normal addressing of text book modeling in an ever changing industry and world to the issue of net profit gaming based on two primary theories : *The Completion Backwards Theory*, Hereafter as CBT Whereas, Successful or Unsuccessful Models and End Results, Positive or Negative are a "Known." The Theory Model Information is Available to Identify "Working Backwards." Areas, Points, Modules, Modulation, Aspects, and Replicate Modeling Where the Model can be Improved or Failed or Failure in the Cognitive Process to the Application or its Formulation in Real Time and Replicated and Improved on, Mirrored, or Reinforce the Positive or Negative Applications In Use or Overlaid to Positively Identify Success, Failure or Moot Issues or Duplicate Instances.

CBT (Completion Backwards Theory) is an Internal or External Audit Dissecting the Process Beginning at the Net Profit and Working Backwards. In the Land Based, Satellite, or the OnLine Gaming Industry, the Gross Net Profit to Gross Revenue (NPNR) Determined by Defined Random Odds to the Payout is on the Average 2.5% Net. The Error Margin to Applied Business Standards is Critical to Success and Profitability. Which brings us to the *Net of the Net Theory*: Standard Text Book Applied Business Standards to Gross Net Profit and Net Profit and the Occurrences and Expenses in Between the Two are the Key to Profit or Loss. Primarily Management, Mismanagement, Dismangement (Management of Areas or Projects NOT in their Expertise); Nepotism; MisModeling Demographics and Micro Markets, Technology Knowledge and Capacity, No Out of Box Imagination to Implementation; Application of Text Book Knowledge to Actual Real Life Modeling (Theories like 1) You can fool most of the people all of the time. 2) People will not notice the changes. 3) Abstract Existential Accounting Changes by the Actuary.; Surrender to the New Age of Marketing and Return IE Snail Land Mail Return Per Dollar; Improper Bonus System Management; Improper Progressive Funding; Processing Liability; Additional Costs, Poor Customer Service; PrePaid Agreements in and to Marketing, Advertising, and to Affiliates; Fraud both In House and External Market Condition Adjustments; 4) Technological Acknowledgement and Advance across all mediums to surgically create the ultimate profile of the client and customer to address retention and loyalty just to Name a Few. The List goes on forever and the Tropicana as one of the first LBOs to fall to all of the above is just a taste of PEFs trying to live off the tit of the Cash Cow thinking they there is a revolving door of cash to be pulled out of the properties with an adjustment here and adjustment there. Too many viewings of the movie Wall Street and Gordon Gecko and "Greed is Good!"; the movie

Casino and the Kansas City shuffle-Can you believe Mayor Goodman played himself in that movie with the gangsters and organized crime figures that Goodman used to represent; and too many Howard Hughes Stardust late night stories of buying casinos, calling in for movies on the Hughes TV Station, and girls and binges that went on for weeks and months. Only in Vegas!

However, the Majority of the Issues in the *Net of the Net Theory* in the Attrition of Gaming, now LBO transitions and PEF buyouts in Las Vegas from Groups who have little knowledge of the Gaming Industry or Vegas Modeling, over extended want-to-be's in the Macau Casino market, Online Poker Rooms, and a desperate OnLine Gaming Industry are from Uneducated Executives, Poor Business Practices, and Unethical Business Standards NOT from disposable income, the economy, or any other source. Yes, I did write Unethical Business Standards which the client or customers view with distain-Higher Rakes; Deposit Fees; ATM Fees; Less Customer Rewards and Comps; Watered Down Jackpots and Progressives then ever before in an Industry that wrote the book on Customer Care. The Actuary has dissected every possible asset and made existential liability accounts suddenly become asset accounts with a change of policy. Eventually there is no *Net of the Net Theory* as there is no Net to Catch the Fall. *There Will Be Blood* in Vegas, Macau, Online, and in the Poker Industry as the attrition takes places over the next two years as all aspects of gaming become one and the Murdochs, the Packers, the Bransons, LVS, Stations, Ladbrokes, Melco, LVS, IGT, MicroGaming, Aristocrat, and others will have the vision and where with all to weather this era of attrition of LBOs and legalization across all media formats as the tax revenues already identified from online legalization and the recent Visa and Mastercard IPOs will all need a piece of the action and the Vig and Credit Card Juice. Look to the Mid East, the Far East, and the Sovereign Funds for the funding to pick up the leverage buy outs, the unfinished projects, and lead the way with the other real players who live for moments like this and the piece of the action that they are really after is just being explored.

In a recent study I undertook, ATM and Cash Advance Machine square footage outperformed slots, poker, sportsbook combined per square foot together over the past 10 years. The whole Ultimate Cash Rewards Program (we own UltimateCashRewards.com BTW) should have all aspects built into it with a relational database that is comparable to every transaction, game, date, time, time of play, instant Uncashable Rewards, and incentive to move the land based client and customer online to reduce land mail costs and to prepare the customer and client for the FREE Game Room that mirrors the games on the casino floor (Downloadable GPS to “their machine and their game,” and the inevitable legalization of online and mobile gaming. All of the information of which MUST be fed into the ever growing informational profile of the customer and client. *Get Out Of The Box* as it is closing all around you! All Media Formats! New age and new wave cognitive approaches-IF you are going to give away the room at the price you are charging THEN give it to someone who has a KNOWN value and history. Simple math but *Out Of The Box*. Look at what the Experience has done and the success they are having with it-*Back to the Basics!* Value. Gaming. Good Food. Variety of Casinos to choose from and well thought out outdoor events and the feel of Old Vegas. No differentiation from the successful model that made Vegas. Sure, you will not have Million Dollar Baccarat games and \$5,000 sunglasses but the micro market in Vegas on the Experience is fairing much better than the Strip on attaining projects, goals, and holding their position in this down turned market.

InfoGaming.com has 100% Guaranteed, Qualified and Quantified, Strategic Business Plans ready to implement for Land Based Casinos; Land Based Casinos in Transition to Online Features and Online Preparation; White Label (Skins) Online Casino Business Plans; Cutting Edge Player Reward Program Business Plans for Land Based and Online Gaming. The brief outlines on the InfoGaming.com web site are just a glimpse-a cracked door, into the implementation of these Business Plans. YES, Single and Double Digit Land Based Downtrend Land Based Gaming Markets Can Be Reversed and Negated! YES, Niche and Micro Markets
